

Work Session Participants

- Cincinnati Health Department: Martha Walter
- Cradle Cincinnati: Jessica Seeberger
- Nationwide Children’s Hospital, Ohio
 Better Birth Outcomes: Angela Abenaim, Alicia Leatherman
- Ohio Association of Community Health Centers (OACHC): Teresa Rios-Bishop
- Ohio Department of Health (ODH): Michelle Clark, Angie Norton
- Ohio March of Dimes: Lisa Holloway, Lauren Henderson
- Ohio Perinatal Quality Collaborative: Karen Hughes

Awareness – What are we learning from national, state, and regional LARC activity?

- The group welcomed Lisa Holloway and Lauren Henderson with the Ohio March of Dimes. The following March of Dimes materials align with LARC Access Ohio:
 - [Ohio Strategic Mission Investment Plan 2017-2020](#)
 - [Fact Sheet - Prematurity Campaign Plan to achieve 2020 and 2030 goals](#)
 - [2016 Premature Birth Report Card](#)
 - [Fact Sheet - Birth Spacing and Birth Outcomes](#)

Exploration – What’s the next level of thinking needed to advance our strategies?

Strategy: LARC awareness media campaign to improve consumer knowledge

What	Discussion	Action Items
Update health center data on bedsider.org : complete add/change/delete actions	Group explored bedsider.org site and its provider search capabilities. All organizations were encouraged to update provider information using the following approach: <ul style="list-style-type: none"> • Go to “where to get it” on the Bedsider web site. Plug in the city, state or zip code(s) in the first box <i>From a Health Center</i>. You will see listings for the clinics in the defined region. If the clinics you are looking for are not listed, complete this form. If the clinic you are looking for is listed but needs some information edited, the same form is used to edit existing clinic information. The form only takes a few minutes to complete and you can even upload pictures of your clinic(s) if you choose to do so. Again, it is the same form to either add a new clinic or edit an existing listing. • If you have any problems or issues completing the form or with the information that is currently online, please contact Eva Anifantis directly at the National Campaign to Prevent Teen and Unplanned Pregnancy at eanifantis@bedsider.org or 1-202-350-1TNC. 	<ul style="list-style-type: none"> <input type="checkbox"/> ODH will coordinate updates for Title X sites. <input type="checkbox"/> ODH will coordinate updates with OEI organizations. <input type="checkbox"/> OACHC will contact bedsider.org to explore efficient method for updating information on ~280 community health centers.

What	Discussion	Action Items
Shared campaign content to raise LARC awareness	<p>ODH approved funding to OACHC to purchase creative license for LARC campaign content from the National Campaign to Prevent Teen and Unplanned Pregnancy. The license will provide use of the campaign creative across Ohio. OACHC just received this exciting news and will be working with the National Campaign to better understand what is technical assistance is provided with the creative license. ODH funds were not allocated for a media purchase.</p> <p>Group discussed the opportunity to learn from the National Campaign via technical assistance.</p> <p>The Center for Community Solutions recently released “Whoops Proof in NEO: Contraception Awareness Campaign Implementation and Findings”.</p>	<ul style="list-style-type: none"> <input type="checkbox"/> OACHC will ask National Campaign to provide the group with an informal overview of creative content at its May or June work session. <input type="checkbox"/> OACHC will include group in a formal technical assistance webinar once a timeline is established with the National Campaign.
Media purchase for campaign with consistent messaging across the state with co-branding opportunities	Group discussed the idea of leveraging LARC Access Ohio to pursue public and/or private funding to support a shared media purchase across Ohio.	<input type="checkbox"/> Agenda item for further discussion.

Strategy: LARC practice transformation to improve alignment of provider practice culture and work flow with best practices

What	Discussion	Action Items
ODH-OACHC Practice Transformation Project	<p>OACHC shared the project name is Ohio FQHC IVI (Infant Vitality Initiative) and includes nine practice sites across 5 community health center organizations. The practices recently came together and the following learning was shared:</p> <ul style="list-style-type: none"> • Changes in workflow – need for buy-in and engagement from all physicians and staff. • Sustainability – exploring how to create a positive financial margin with revised workflow. 	<input type="checkbox"/> OACHC will continue sharing information from the project to inform other practice transformation projects.

Strategy: Collaborative Structure to improve sharing, learning, alignment, leveraging of resources

What	Discussion	Action Items
Learning Group website: platform for sharing our learning and best practices	Group discussed need to establish a website to share learning, best practices and document our progress. We need to be intentional about who is in the best position the maintain the site.	<input type="checkbox"/> Agenda item for further discussion.

What	Discussion	Action Items
<p>Measures LARC Access Ohio Impact</p>	<p>Group explored inventory of measures and shaped the following as a good place to start based on alignment with our purpose and availability of data:</p> <ol style="list-style-type: none"> 1) Access to LARC - for Medicaid beneficiaries between ages 15-44, based on evidence of LARC provided via Medicaid claims data 2) % of unintended pregnancies - using the Ohio Pregnancy Assessment (OPAS) is a statewide, ongoing, targeted population-based survey that utilizes the Center for Disease Control (CDC) Pregnancy Risk Assessment Monitoring System methodology to collect information and attitudes on residential women who give birth in Ohio. At the request of the Ohio Department of Health (ODH) and the Ohio Department of Medicaid (ODM), the Ohio Colleges of Medicine Government Resource Center (GRC) is administering the OPAS to assist in the monitoring of maternal and infant health. The 2016 OPAS will provide data to improve the health of mothers and infants. OPAS data provides information not available from other sources about pregnancy and the first few months after birth. This information can be used to identify groups of women and infants at high risk for health problems, to monitor changes in health status, and to measure progress towards goals in improving the health of mothers and infants. Additionally, the 2016 OPAS will provide data to measure progress in Ohio's maternal and infant health (MIH) initiatives and will be used by researchers to investigate emerging issues in the field of reproductive health. The 2016 OPAS is a stratified mixed collection mode random survey of residential women who gave birth in Ohio. Relevant populations of interest, such as the nine Ohio Health Equity Institute (OEI) counties, will be oversampled to facilitate analysis of Ohio's MIH initiatives and ongoing program development. Sampled women will be contacted approximately 2-4 months after delivery and can participate by completing a mailed survey, online survey, or telephone survey. The 2016 OPAS will provide valuable information to improve maternal and infant health across the state. 3) Infant Mortality Rate based on vital statistics data. 4) % of births safely spaced using 18 months based on vital statistics data. <p>Group indicated desire to view data both geographically and with a focus on disparities.</p>	<p><input type="checkbox"/> Agenda item for further discussion.</p>
